

### Investment Objective

The investment objective of the growth strategy is to generate a higher return than its benchmark, net of all fees. Starting January 1, 2019, the benchmark is made up of 60% of the S&P/TSX Composite Index, 15% of the S&P 500 Index and 25% of the FTSE TMX Universe Bond Index.

### Description

The growth strategy aims to provide income and capital appreciation through investments in individual securities, exchange-traded funds and the Rivemont Absolute Return Fund. At Rivemont, we believe that the price of an asset is not always equal to its intrinsic value since the price is influenced by several factors, including several cognitive biases on the part of investors. Since these biases are known, and repeat themselves over time, it is possible to make investment

decisions based on these recurring behaviors. We rely on momentum-based strategies including technical analysis and trend monitoring. The manager uses a top-down approach by establishing first which sectors have the highest growth potential to subsequently, within these identified sectors, to select specific securities. The strategy maintains a healthy diversification and constraints are in place to manage risk.
